

IVA Connect Desktop

IVA Connect Desktop application

IVA Connect desktop software designed for PCs running Windows or MAC OS operating systems (OS). It can be downloaded from the unified corporate IVA MCU platform. The IVA Connect Desktop application allows you to exchange messages, photos, video and audio files with users.

Features of the application

- Contact list management – adding and deleting contacts, updating the information in contact cards;
- Using file storage – you can upload and download documents, photos, and pictures;
- Creating chats – you can create and delete personal or group chats with all your contacts;
- Chatting with the ability to exchange messages and files in different formats;
- Chat participants management - adding and removing contacts participating in the chat, moderating conversations;
- Push notifications for requests to add to the contact list, sound notifications about incoming calls and message notifications.

Advantages of the application

- Corporate messenger;
- File exchange and storage;
- Fully developed domestically;
- Fast and convenient technical support;
- Documentation in Russian;
- Easy installation and setup.
